

JP Nexus CoinDCX Algo

Complete User Guide - Account, Registration, Configuration & Payment

Important: Crypto trading mein market risk hota hai. Profit guaranteed nahi hai. Pehle DRY RUN use karein aur sirf utna capital use karein jitna risk aap samajhte hain.

Quick Journey

1	CoinDCX account open + KYC
2	JP Nexus account register
3	Subscription payment submit
4	API + Telegram configure
5	Approval ke baad bot start

Support: 9316407841 | jitchaudhari1977@gmail.com

1. CoinDCX Account Kaise Open Karein

1

Official referral link kholen

JP Nexus home page par Open CoinDCX Account button dabayein. Link:
invite.coindcx.com/93585914

2

CoinDCX par sign up karein

Apna PAN ke according full name, email aur strong password enter karein.
Email/mobile/authenticator OTP se verification complete karein.

3

KYC complete karein

PAN number + date of birth verify karein, Aadhaar/Passport identity verification, live selfie, income aur occupation details submit karein.

4

Bank account add karein

CoinDCX app mein Add Bank Account kholen, account number aur IFSC enter karein, OTP verify karein. Account aapke apne naam par hona chahiye.

5

Security enable karein

Google Authenticator/2FA aur withdrawal password enable karein. OTP, password ya recovery code kisi ke saath share na karein.

2. JP Nexus Registration & Payment

1

Create account

jpnexusalgo.info/register kholen. Unique username, valid email aur minimum 10-character password enter karke Register karein.

2

Sign in

Registration ke baad login page par username/email aur password se sign in karein.

3

Payment page kholen

Menu ya bottom navigation mein Payment select karein. Screen par dikhaya gaya exact final amount QR/UPI se pay karein.

4

Payment details submit karein

Promo code ho to pehle Apply karein. UTR/transaction reference, payment date aur payment screenshot (JPG, PNG ya WebP; maximum 3 MB) upload karein.

5

Approval ka wait karein

Submit for verification ke baad status Payment History mein dikhega. Bank verification ke baad admin 30-day subscription approve karega.

Payment screenshot mein successful amount aur UTR readable hona chahiye. Galat UTR ya unclear screenshot approval delay kar sakta hai.

3. CoinDCX API & Nexus Configuration

1

CoinDCX API key banayein

CoinDCX login > Profile > Access API Dashboard > Create New One. Label dein, Google Authenticator OTP enter karein aur email confirmation complete karein.

2

Keys safely save karein

API key aur secret key turant safe password manager mein save karein. Refresh ke baad secret dobara visible nahi ho sakta.

3

Nexus Configure kholen

JP Nexus dashboard > Configure. Primary market select karein aur apna trading capital enter karein.

4

API details enter karein

CoinDCX API Key aur Secret Key paste karein. Withdrawal permission kabhi enable na karein. Keys WhatsApp, Telegram ya email par share na karein.

5

Telegram optional setup

Telegram Bot Token aur Chat ID add karne par entry alerts milenge. Agar Telegram nahi chahiye to fields blank chhod sakte hain.

6

Risk plan & save

Risk preset select karke Save configuration dabayein. System BTCUSDT, ETHUSDT aur SOLUSDT scan karta hai; strategy NEXUS SCALP 15-minute RSI/MA crossover aur ATR risk management use karti hai.

4. Bot Start, Monitoring & Safety

1

Approval check karein

Dashboard par active subscription aur access approval hona zaroori hai. Approval ke bina Start Bot available nahi hoga.

2

DRY RUN se start karein

Har new account simulation mode mein start hota hai. Dashboard par Start Bot dabayein aur Activity/Logs monitor karein.

3

Telegram alerts dekhein

Entry alert mein Order, Status, Entry, SL, TP aur AI Score milega. SL = stop-loss; TP = target price.

4

Live mode

Sirf admin live execution enable kar sakta hai. Live mode se pehle CoinDCX balance, API access, capital aur risk plan dobara verify karein.

5

Stop when needed

Dashboard par Stop Bot use karein. API key revoke/change karne ke baad Nexus configuration bhi update karein.

Never share: CoinDCX password, OTP, authenticator code, API secret, bank OTP, or JP Nexus password. JP Nexus support kabhi withdrawal OTP nahi maangega.
